

Ball's Beefsteak VFFT Hybrid	This is a great choice for gardeners who want to grow luscious, big tomatoes but need them to mature early and stand up to the challenges of disease problems. These 8 to 12 oz. globe-shaped fruits grow on highly disease-resistant plants, having no cracking, and offer sensational, old-fashioned flavor. Wonderful as a sandwich tomato.	80 days	Indeterminate
Better Boy	(VFNASt) A spectacular, midseason variety with plump, juicy, deep red tomatoes that often weigh more than one pound. And once they arrive they just keep on coming! Fruits are extremely flavorful, with flesh that's juicy, yet firm. Heavy foliage protects fruits from sun-scald. A highly adaptable variety that thrives in nearly any climate. Demonstrates excellent disease resistance.	75 days	Indeterminate
Black Brandywine	A prolific yielder whose novel, black fruits are well-formed, oval shaped, with "real tomato taste"!	80 - 100 days	Indeterminate
Celebrity	(VFFNTAST) This AAS Award Winner established a new standard for main-crop hybrids requiring multiple disease resistance. Highly adaptable from Canada to the South. medium sized, globe-shaped fruits are crack-resistant and average 7 oz.	70 days	Semi-determinate
Champion	(VFNT) One of the earliest full-sized tomatoes bred for those luscious tomato sandwiches. Flavorful and prolific, the 6 to 8 oz. round fruits are solid, meaty and very sweet.	62 days	Indeterminate
Early Girl	(VFF) It's hard to find tasty, full-sized fruits like this extra-early in the season! Meaty, ripe, red fruits, 4 to 6 oz., are slightly flattened and bright crimson throughout. Very appealing, with firm texture and blemish-resistant skin. Heavy yields on hardy vines.	57 days	Indeterminate
Early Opener	(VF) More often than not, early-ripening tomatoes are under-sized, have marginal flavor and color with way too many blemishes. This new tomato developed by the same breeder of Early Girl and Better Boy Hybrids, produces blemish-free fruits about 33% larger than Early Girl with marvelous flavor that's sweet and juicy. Strong, vigorous plants are capable of tremendous yields. Strong disease resistance.	57 days	Indeterminate
Estiva	Medium large, globe-shaped, red fruit. The size is quite uniform, avg. 6-7 oz. Tomatoes are smooth and firm, with a small stem scar, and resist cracking. The taste is excellent. Truss harvest possibilities. For production outdoors or in well-ventilated hoop houses. Good disease resistance.	70 days	Indeterminate
La Roma II	The Tomato LaRoma II Red, 'Lycopersicon lycopersicum' produces tasty fruit on large vigorous plants. It is known for its outstanding vigor and uniformity. The LaRoma II Red was bred for disease resistance and is highly so.	80 days	Determinate
Legend	The battle with blight fungus just took a turn for the better! Legend has shown a strong tolerance to blight strains in even the most virulent regions like the West Coast. Round, shiny red fruits average 4 to 5", with sweet flavor and just a little acid to add a touch of zing. Green shoulders, few seeds, and good uniformity in the earliest-maturing slicing tomato of its kind.	68 days	Determinate
Lemon Boy	(VFNASt) Lemon yellow, not golden in color. Highly adaptable plants yield large, deep oblate fruits, averaging 6 to 7 oz. and about 3-1/2" across. Out-yields all other "golden" tomatoes available. Mild flavored and adds an inviting color to salads.	72 days	Indeterminate
Mortgage Lifter	AKA Radiator Charlie. Longtime favorite with good yields of very large, smooth, pink-skinned fruits even in droughts. Very meaty fruits with few seeds, much like Giant Belgium, but not quite as large. Very mild, delectable, sweet flavor.	85 days	Indeterminate
Oregon Spring	Early variety that sets loads of meaty fruits weighing 3 to 5 oz., with excellent flavor. Compact plants set fruits even in cool weather and continue to yield all season long. Nearly seedless. A perfect choice for ketchup and sauces.	60 days	Determinate
Patio	Perfect for container gardening or in limited space. Vines are extremely compact, yet produce medium-sized, deep oblate fruits that are smooth, firm and flavorful.	70 days	Determinate
Polebig	High yields of very good tasting, meaty, 6 to 8 oz. globe shaped fruit. Uniform ripening time. Excellent deep red internal and external color.	60 days	Determinate
Siberian	Bright red, egg-shaped, 2 to 3 inch fruits have an excellent flavor. Very early. Plants are dwarf with a spreading habit.	57 days	Determinate
Sungold	A positively luscious, bite-size golden beauty overflowing with an abundance of fruits: Thin-skinned, with a juicy flesh that holds its oh-so-sweet, fresh from the vine flavor. Very early, and a heavy cropper both outdoors and in greenhouses. Cascading trusses are smothered in fruits that remain ripe and ready for picking over long periods of time.	70 days	Indeterminate
Sweet 100	Huge, multiple-branched clusters of 1/2" very sweet fruit with high Vitamin C content. Mouth-watering flavor. Vigorous vines bear abundantly until frost and need staking for best results.	65 days	Indeterminate
Yellow Pear	Vigorous vines produce high yields of 2" yellow-skinned, pear-shaped fruits with few seeds. Slightly later than Red pear, but with the same prolific yields and dependable performance.	78 days	Indeterminate

Disease Resistance Identification:

V : Verticillium Wilt

F : Fusarium Wilt (FF - Races 1 & 2, FFF - Races 1, 2 & 3)

N : Nematodes

T : Tobacco Mosaic Virus

A : Alternaria Stem Canker

St : Stemphylium Gray Leaf Spot

TSWV : Tomato Spotted Wilt Virus
