

Warner's Expert Advice: Small Space, Low Cost Gardening!

Quick & Easy Tips for Small Space Gardening.

1. **Choose Superstar Producers** – Crops like cherry tomatoes will produce earlier and more prolifically than traditional slicing tomatoes. They also require less space for growing, so you can plant them in 7 to 10 gallon pots and set them near a sunny window, or on a porch or deck. Here's a great resource for ['Vegetable Container Gardening.'](#) ENJOY!
2. **Group Like-Minded Plants Together** – Group plants that cohabitate well together in the same pot for efficient, space-saving growth. You may also find it fun to add some innovative design flair to your growing space by pairing draping and flowering plants like alyssum to your colorful designs for an eclectic and symbiotic mix.
3. **When In Doubt, Go Small** – Dwarf varieties are expected to make a comeback for folks who are grappling with the challenge of limited space. Growers are constantly introducing new varieties, and we'll be happy to help you select compact growing veggies. If you're aiming to grow non-edible varieties, dwarf conifers offer easy care with minimal watering for people who want to add a bit of year-round greenery to their outdoor living space.
